

## Environmental Protection Policy

DynaVat Gold Mining Technologies is committed to meeting or surpassing regulatory requirements in all its activities, while safeguarding the local environment for our stakeholder communities and future generations. DynaVat Gold Mining Technologies will therefore:

- Ensure that our leaders and managers are committed to creating a culture that integrates environmental matters into the short- and long-term operational, performance, and contractor management systems;
- Include the prevention of pollution as an integral part of our day-to-day operations;
- Identify measurable objectives and targets that will drive the continuous improvement necessary to pursue incident-free operating activities;
- Providing information to our employees and contractors allowing them to understand that upholding our environmental policies and procedures is a fundamental part of our business;
- Training our employees and contractors in environmental matters;
- Implement effective environmental policies, procedures, and management systems;
- Encouraging the conservation of resources through programs to promote the efficient use of materials and energy, and waste management;
- Prepare, review, and regularly update site-specific environmental management, closure, and rehabilitation plans and include inputs from our stakeholder communities and regulators;
- Complete progressive rehabilitation of disturbed areas in conformance with the site-specific environmental management and closure plans;
- Consult our stakeholder communities and regulators to provide us with input to our permitting, and environmental management policies and procedures;
- Review our environmental performance at least annually and publicly report our environmental performance.

A blue ink handwritten signature, appearing to read 'Duane Nelson', is written in a cursive style.
